# Seminare:
# Certified Blockchain Practitioner

TECHNIKUM WIEN ACADEMY

Blockchain will leave its mark on all areas of the economy. Companies are already exploring the advantages of this technology. Their successful pilot projects and proof of concept already point the way to the future. The potential for your industry and how to design your business idea will be dealt with in Module 1 „Blockchain Business".

This seminar is open to all interested parties. Oen of the most important key competencies is the knowledge of the most important distributed ledger technologies and the latest developments, as well as the thoughtful use of these in the course of developing a decentralized application. These topics will be covered in Module 2 „BlockchainTechnologies". For this module, previous technical knowledge is required. Attending both modules and passing an exam qualifies as a „Blockchain Practicioner".

The seminar is held in cooperation with our partner BlockExpo GmbH.
